

WHY MUST YOUR COMPANY USE BROWSER-BASED UNIFIED COMMUNICATIONS?

MORE BUSINESS

UP TO + **52%**
MORE SALES
VIA WEB

Only Wildix allows web visitors to call you, text or video chat, share documents, and more directly from your website.

WebRTC KITE integrates the **PBX with your website**: you'll never miss a call.

MORE EFFICIENCY

UP TO -**25%**
SAVED TIME IN DAILY
OPERATIONS

Wildix is the first totally web-based solution and is also **mobile first: the Wildix App** works on **any smartphone operating system**, wherever you are supported by an internet connection.

SECURE-BY-DESIGN

100% SECURITY
WITH NO FURTHER
APPLICATIONS

Traditional PBXs and UC&Cs require **the addition of SBC and VPN infrastructures** to work remotely.

Wildix is secure-by-design: no need for SBCs or VPNs. **Voice and data are always protected** thanks to the **native encryption** system.

**The First Cloud Browser-Based Unified Communications
and VoIP PBX**

The only VoIP phones that display the presence status information of on-site and remote colleagues.

Cordless DECT W-AIR System

Healthcare, lonely workers, offices: phones features match your industry's needs. Fully integrated into the Wildix system and easy to install.

...One of the company's benefits is Wildix being the innovative it company, open and transversal, not just another telephony company. This allowed us to create the real synergy with Wildix.

Alessio Porcellati
IT Manager, TEMPUR Italia

...The practical benefits of VoIP and unified communications are evident, but we have also done the cost-benefit analysis. According to the forecasts, in just two years, the investment will be fully amortized, thus in a short time we will have a net saving.

Roberto Raggi
IT Manager, CONQORD OIL
